

REMARKS

Consideration of the subject matter in the accompanying patent application is respectfully requested.

The Notice of Allowance and Fee(s) Due requested that the specification be amended to include the sequence identification numbers of the oligonucleotide and peptide sequences shown in the figures, as well as a new sequence listing for any sequences not previously listed. The amendments to the specification keyed to the numbered paragraphs of the specification published as US 20060246092A1 are provided above. Each of those sequences was already present in the filed sequence listing, so a new such listing is not provided herewith.

The numbered paragraphs were copied from the published version of the application available from the US PTO data base. Greek letters, subscripts, superscripts and italicized words are not present in that publication and have been provided to the above text based upon the pdf version of the published application also available through the US PTO.

No new matter is believed to have been added in this amendment.

No further fee or petition is believed to be necessary. However, should any further fee be needed, please charge our Deposit Account No. 23-0920, and deem this paper to be the required petition.

The Examiner is requested to phone the undersigned should any questions arise that can be dealt with over the phone to expedite this prosecution.

Serial No. 09/498,046

Respectfully submitted,

By 
Edward P. Gamson, Reg. No. 29,381
